

New QuadSweet! Nectar [1]

New QuadSweet

Nectar, (CSQBF14-773), falls into the Quad Sweets family of heirloom taste and modern sweetness. At a 78 day maturity, it works well in tandem with Tempress. Nectar has a good size plant at 7' and a nice ear height of 30". It has excellent tip fill and husk protection and overall has a very nice appearance. It is easy to harvest, as it has a quick snap, is easy to package, and stores well. Nectar, like the rest of the Quad Sweets, is a grower friendly variety and a favorite with customers for it's exceptional taste.
