intermediate	105-110	golden brown	colossal	very high	3-4	globe

## Avalon (4241)

Avalon is a very sturdy, yet flexible, late intermediate Spanish onion. This variety allows a smooth transition from intermediate to long day varieties. Growers enjoy the ease of the Celebrate plant structure, the size potential, single centers, and the consistently firm bulb that it produces.

The grower also has the option of mechanical harvesting with Avalon.

Disease Ratings: A high tolerance to pink root, fusarium, and bolting.

The **Celebrate Onion Line** is a new generation of onions that are revolutionary in plant structure. This new line of onions from Crookham Company has been through an aggressive selection process to find traits desirable to the grower. Celebrate Onions have vigorous tall tops that stand out in a field. These tops create a canopy that helps protect the bulbs from damages brought on by too much direct sunlight.

In addition the tall erect tops are better suited for chemical application and provide fewer hiding spots for thrips.

Please see [crookham.com](http://crookham.com) for more information on the Celebrate Series of Onions.

Disease ratings defined by ISF Position Paper of May 2005. Refer to [www.worldseed.org](http://www.worldseed.org) for more information.
