YELLOW SPANISH

ONION SERIES

days length (latitude)	maturity (approx. days)	skin color	bulb size	% single centers	storage (months)	shape
short	155	straw	jumbo	very high	2	globe

Merlin (1122)

Merlin (1122) is a great early to main season short day yellow variety that produces a firm uniform bulb. It also has the Celebrate plant structure to give it an extra boost against stress and make it grower friendly. These qualities help to make it a good fit for a short day program.

Disease Ratings: High Tolerance to Pink Root, Fusarium, and Bolting.

The **Celebrate Onion Line** is a new generation of onions that are revolutionary in plant structure. This new line of onions from Crookham Company has been through an aggressive selection process to find traits desirable to the grower. Celebrate Onions have vigorous tall tops that stand out in a field. These tops create a canopy that helps protect the bulbs from damages brought on by too much direct sunlight.

In addition the tall erect tops are better suited for chemical application and provide fewer hiding spots for thrips.

Please see crookham.com for more information on the Celebrate Series of Onions.

Disease ratings defined by ISF Position Paper of May 2005. Refer to www.worldseed.org for more information.
